PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER:	8815	SESSION NUMBER:	01
DATE OF SESSION:	25 OCT 88	DATE OF REPORT:	25 OCT 88
START:	0845	END:	0943
METHODOLOGY:	CRV	VIEWER IDENTIFICATION:	025

1. (S/NF/SK) MISSION: Access and describe the object of intelligence interest. Provide sketches in support of your findings.
2. (S/NF/SK) VIEWER TASKING: 6 digit encrypted coordinates: 11069B/259179.
3. (S/NF/SK) MONITOR'S COMMENTS:

a. Inclemencies: None reported.

b. 025 exhibited all the micro-movements and signs of being in very good contact with the site. The AOL of Russian Shuttle developed late in the session and 025, realizing that it would cause drive, called a break. Upon return, 025 appeared to have completely gotten rid of the AOL.

c. Session was performed double-blind, so no other definite critique of Viewer performance can be given. SOI is attached.

4. (S/NF/SK) EVALUATION: 3 *M.*

SUMMARY OF INFORMATION

The object is off-white with long cylindrical portions and is perpendicular in position. Land is at the site and this object is in an air silo sounding area. A related portion of this object recedes and a cylindrical portion comes outward in design. The bottom of the cylindrical part is complicated (see sketch on *for an outline* page 5 and photos). Dictated captions and target areas are of interest (markings). This object has receptors and controlled communication devices (SIGINT). The object is a means to which controls are utilized to describe things. Although this object in its current state is stationary, it is activities-dependent (future undesignated missions). The focus is long and short *dependent upon* *on* *the* *project* outcomes, and *related to* *the* *resolutions* depicting distance.
